GENERAL INVESTMENT COSTS BY THE PROJECT

- Overall volume investments, \$

- 150,000

Payback period - 3 years;

Form of investor participation in the project:

Direct investments

branch of the Belarusian Railway
(distance from the site): 7 km

republican highways: 2 km

Sales of products:

market of the Republic of Belarus

external markets (Russia, Ukraine,
Poland, Lithuania, Latvia)

The aim of the project is the cultivation and industrial processing of veshenok. Cultivation and processing of oyster mushrooms has all the conditions for becoming a profitable business, the main among them are: lack of great competition in the market; constant demand of the population for this product; the unlimited nature of such a necessary raw material for a given production, like straw, sawdust wood, which is environmentally friendly.

This culture has a high yield. Oyster mushrooms are delicious and relatively inexpensive, so they are popular, which makes oyster mushrooms a profitable business. This business is not yet widely distributed, so mushrooms take with pleasure restaurants, cafes, food stores, wholesale organizations.
